

# Professional and sustainable sealing

Perfect and persistent sealing results with the user-friendly die-cut sealing machine

PACOVIS.COM

# For fast and reliable results

*These professional sealing machines are ideally suited for sealing our biodegradable carton/PLA round bowls of 150 mm and 185 mm diameter. The sealing films seal the bowls tightly, so that they are leak-proof.*

This compact semi-automatic sealing machine can be used anywhere and requires virtually no maintenance or use of spare parts. The sealing machine automatically determines the optimum pressure required to heat-seal the packaging. The temperature (per °C) and sealing time (per second) can be adjusted digitally for an optimal sealing result.

The machine is equipped with a mould and shape cutter that cuts the film cleanly around the round bowls. The remaining film is automatically wound up by the machine.

#### **The benefits at a glance:**

- ✓ Professional, consistent sealing results including mould and shape cutter (die-cut)
- ✓ Remaining film is automatically wound up
- ✓ Can be used for cold and warm dishes
- ✓ User-friendly and easy to operate
- ✓ Sealing film with anti-fog property for the optimal presentation of your food

- ✓ **Guaranteed leak-proof**
- ✓ **Equipped with a mould and shape cutter (die-cut)**
- ✓ **Easy to operate**

## **Seal settings**

All bowls offered are sealed with the matching PLA sealing film at 90 °C. Please adjust the machine settings to suit your application and clean the sealing plate daily. For further information, consult the operating manual.
